**Ultra
Immersive
Collaboration
Solutions**

What are the **Fundamental** flaws in

Conventional

 **MS Teams** /  **Zoom** VC meetings?

1. Feeling of not closeness but distance: It does not feel that the other location participants are sitting across the table because both far & near participants are sitting in bowling alley fashion which typically creates a feeling of the other participants being 30-50 feet away where as what we desire is that they are sitting 10-15 feet away.
2. Non fostering of trust and openness: In conventional bowling alley sitting local participants look at remote participants by looking over their shoulder except the chairman as they are not directly facing remote participants. This is not good for building trust & openness.
3. Small size of participants: For participants appear stamp size which makes & it difficult to recognize & understand their body language.
4. Poor lighting further creates dull images of video meetings with participants eyes hidden by shadows
5. All this necessitates avoidable business travel with a huge loss of senior management time & money.
6. Flights have become very expensive & completely unreliable on account of present frequent cancellations for various reasons such as lack of planes, lack of pilots, fog etc. Flying in India is often as a more expensive then flying to South East Asia to Europe
7. AI has quickened the pace of innovation giving much less time for execution & time to narrate

Multi Locations Conventional Video Meeting

How **Business Octane's**

Ultra

Immersive Telepresence on

 **MS Teams** /  **Zoom experience**

removes all conventional VC meetings shortcomings?

1. Business Octane's Ultra Immersive telepresence experience on MS Teams / Zoom that lets you interact face to face life like and real size, as if you are sitting across the table.
2. Provides amazing Video meeting experience unmatched by anyone where cameras do not move but the entire location active speaker is always visible life like & real size which is typically 6 -15 times bigger than how they look like in ordinary video meetings.
3. Amazing audio without having to speak into any microphone creates an experience.
4. Participants are sitting only 10 feet away from the front row and max 15 feet from rear row as against sitting on an average more then 30 feet away in conventional boardrooms video meetings.
5. 6-15 Participants appear to be sitting across the table face to face with another 6-15 participants.
6. Very easy to use the same facility for two location Ultra Immersive telepresence experience or for a multiple location Ultra Immersive telepresence experience.
7. Fully interoperable with participants from their laptops or conventional VC rooms.

Collaborate Ten Times more Effectively for Two Location Meetings

- ▶ Cannot recognise people on account of leadership sitting 25-35 feet from the display
- ▶ Appears and feels as if they are sitting very far
- ▶ Makes your leadership Fly for better experience required for critical reviews
- ▶ Does not aid in building trust and understanding

Meet over conventional video conferencing between 2 locations

- ▶ Leadership Recognises everyone as everyone is sitting 10 feet away
- ▶ Feels as if everyone is in same room
- ▶ No need to fly as meeting experience is as good as meeting face to face for your leadership
- ▶ Aids in Improving trust and understanding

Collaboration like this over Ultra Immersive video meetings for 2 locations with teleprompter

Collaborate Ten Times more Effectively for Multi-Location Meetings

- ▶ Active speaker remains as small as other locations
- ▶ Cannot recognise people on account of leadership sitting 25-35 feet from the display
- ▶ Appears and feels as they are sitting very far
- ▶ Makes your leadership Fly for better experience required for critical reviews
- ▶ Does not aid in building trust and understanding

Meet over conventional video conferencing between Multiple locations

- ▶ You always see active speaker life size and sitting right in front
- ▶ Leadership Recognises everyone as everyone is sitting 10 feet away
- ▶ No need to fly as meeting experience is as good as meeting face to face for your leadership
- ▶ Aids in Improving trust and understanding
