

Addressing

**How would you empower
your Senior Management
for their “big” meetings
in the new normal ?**

Empower your Senior Management with Teleporting Experience!

If your management can not fly for their “big” meetings now, don’t they deserve magical teleporting using MS teams, that too on HaaS?

Pre Covid 19 your management was doing a few meetings on video conferencing. But ordinary video conferencing did not give them the required experience and was not good enough even Pre Covid 19. So for all big meetings they were flying with their team frequently every week. But post Covid their travel has come down to less than 5% of the pre Covid travel.

X

Miniature appearance of participants makes meetings monotonous and reduces productivity of your senior management

Two Locations Teleporting for all!

Multiple Locations with chosen speaker teleported!

Now they use cloud video conferencing of Webex or Zoom or Microsoft Teams or Google meet which has made it very easy to connect multiple people together from anywhere. But again their fundamental video meeting experience is as lacking in finesse and quality as pre Covid.

One of the biggest problems in any kind of video conferencing is miniature view of far site participants who appear more like a post card rather than real people sitting across the table, especially when content is shared in the video meetings.

How these miniature views handicap your senior management?

When the implications of management decisions run into tens/hundreds/thousands of crores of Rs every small detail of far site participant' body language matters for your top team. Do the eyes mean yes or no? Is there an agreement or pretension? Are the facts being given are really true? Are the hands telling something different?

Two Locations Teleporting for all!

Multiple Locations with chosen speaker teleported!

To decipher all this, they along with their team depend upon the body language of other team and vice versa. This body language readability is very poor in ordinary cloud video conference experience, severely handicapping them in the absence of flying to meet face to face.

How to cure this big handicap for your senior management “big” meetings?

Presenting one of its kind solutions in the world - **On cloud Immersive Telepresence (OCIT) solutions**. These **solutions** would allow for the first time your management team to see far team participants 4 times bigger. This would give your management a true face to face meeting experience, practically teleporting them for their “big” meetings on the cloud.

Two Locations Teleporting for all!

Multiple Locations with chosen speaker teleported!

These **OCIT solutions** apart from two locations Immersive Telepresence Experience also provide the highest capability for multiple locations reviews & town halls with separate gallery view along with the separate chosen speaker and separate content.

How to cure this big handicap for your senior management “big” meetings?

Presenting one of its kind solutions in the world - **On cloud Immersive Telepresence (OCIT) solutions**. These **solutions** would allow for the first time your management team to see far team participants 4 times bigger. This would give your management a true face to face meeting experience, practically teleporting them for their “big” meetings on the cloud.

These **OCIT solutions** apart from two locations Immersive Telepresence Experience also provide the highest capability for multiple locations reviews & town halls with separate gallery view along with the separate chosen speaker and separate content.

With 6 sizes of 4,6,8,10,12 &14 PAX with multiple variants for every platform to choose from you will be able to fine tune different level of **OCIT** solutions for different locations of your organization. These solutions are standard yet can be customized and can also be made available for outright buying.

Details of HaaS offerings for every OCIT solution along with monthly service charges are provided in the attached presentation.

HaaS solutions involve fixed monthly charges for 36 months, after which you can upgrade after every 3 years with the latest technology or continue for another year .All that without losing your peace of mind as the whole responsibility of onsite maintenance & services during three years of contract or contract extension lies with us.

This presentation is about MS Teams cloud VC platform based OCIT solutions. However, these OCIT solutions are also available on Zoom, Webex and Google meet.

Further they can have additional native other cloud platforms such as **Zoom, Webex or Google meet** capability for doing high quality video meetings with customers, partners and suppliers who may be using a different network. Additionally, we do have a complete range of one of its kind in the world, highly effective solutions on MS Teams, Zoom, WebEx or Google meet apt for work from home, Huddle Rooms, Executive Cabins, Boardrooms, Conference Rooms and Training rooms. These too are available on HAAS.

Functionality, Aesthetic, Simplicity together is our core design philosophy and making a passionate difference to your organization's Collaboration & Learning is our sole mission.

Looking forward to hearing from you and helping you solve all your video collaboration problems for your senior management “big” meetings and also for the rest of your organization.

Yours Sincerely
Sanjay Bansal
(MD & Chairman – Business Octane)

2

Give your Senior Management double video stream capability to empower them to put spot light on themselves along with showing all other participants separately !

Our TM variant solutions of 6PAX & above are with dual video streams– one for showing full room view and another one for showing active speaker view. This is especially useful for non-Immersive Telepresence meetings.

Now you can have your cake and eat it too !

Full Room View of our solution

Active Speaker View of our solution

Dual video streams- one for showing full room view and another one for showing active speaker view.

Dual View of our solution on the laptop of the far site VC participant without any audio disturbance

Special Capabilities of our Building Blocks

You get 100 % surety that your teams can read the content crystal clear in every local as well as video meetings !

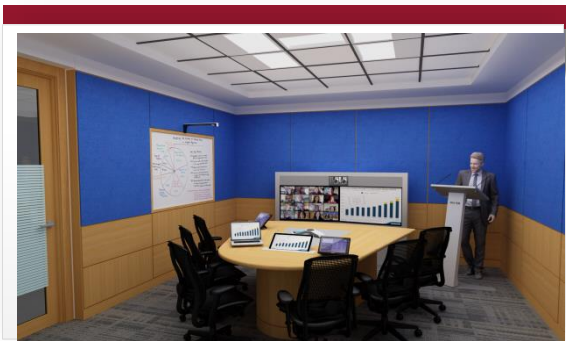

These elegantly embedded **motorized** and **non motorized** content monitors are world's least unobtrusive **content monitors** on account of just **10 CM height** from the table with an angle of **150 degree**, enabling all video and local meeting participants to read the content **crystal clear** **without creating any obstruction in the view of other local & video participants !**

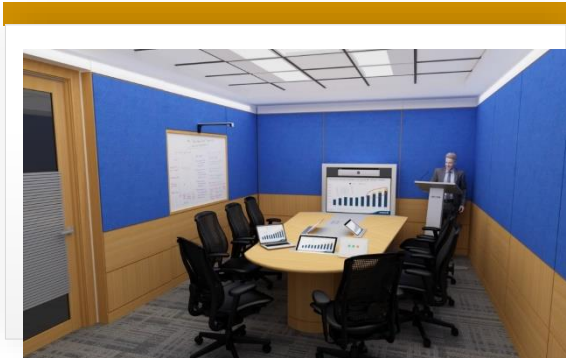

- The video participants can open a MS Teams whiteboard in front of their desk on demand and can work on the same from both near and far locations.
- Content can be readable clearly even from the extreme end of the conference room irrespective of the size of the conference/ meeting room..
- You get surety of 100% content readability in local meetings too.

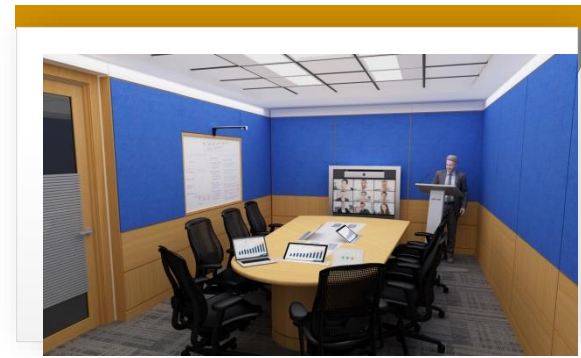

AltraTouchContent™ 15.6 is a 1080p true high definition touch monitor which can work as a touch whiteboard too.

Content can be readable clearly even from the extreme end of the room

Helps everyone to read the content better in local meeting too

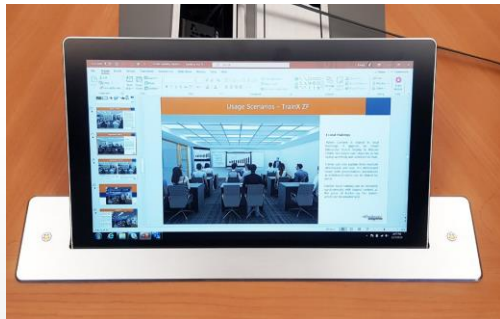

Also, helps in people & content separation and content readability in video meetings

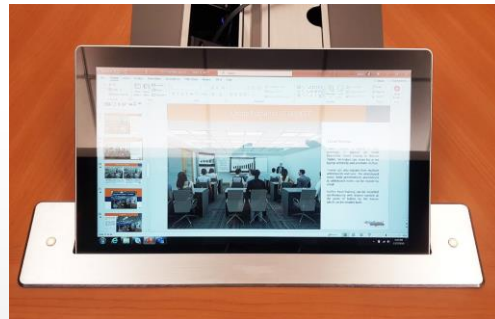

Special Capabilities of our Building Blocks

You get 100 % surety that your teams can read the content crystal clear in every local as well as video meetings !

- iv. Also, comes with anti glare screen for better readability, irrespective of quantum of lighting.
- v. They can easily be retrofitted in a matter of few hours in the existing conference table, meeting room tables, reception desks & training tables.

Anti Glare Coating

Non Anti Glare Coating

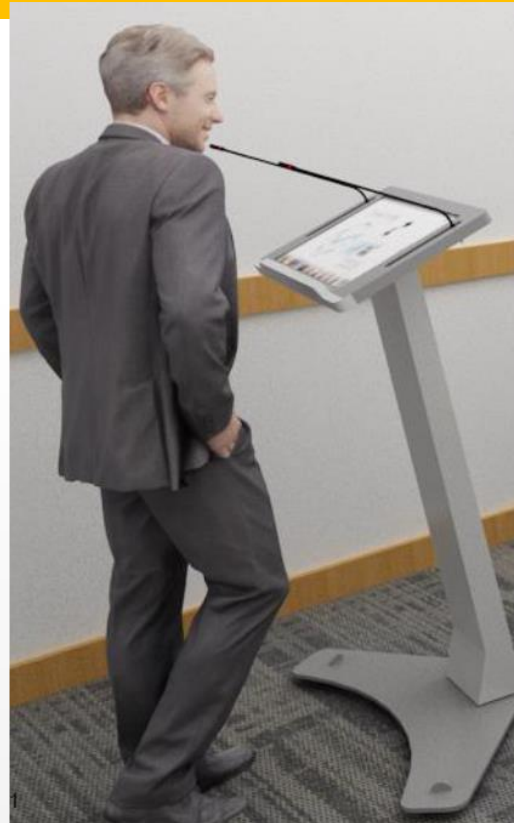

Both Motorized & Non motorized versions available

Non motorized are easy to be retrofitted on the existing tables

Empower your senior management to get everyone on the same page with Interactive white boarding & document sharing !

Empower them to annotate on the content, do interactive white boarding & explain from paper !

Wall Whiteboard sharing during video meetings

Document Sharing during video meetings which also allows you to use paper as a whiteboard

Special Capabilities of our Building Blocks

5

Give them the highest possible eye contact with US patent received Video Optimized Conference Tables & Display assemblies across your enterprise

Design based on
(US Patent No – US 10, 939,073 B2)

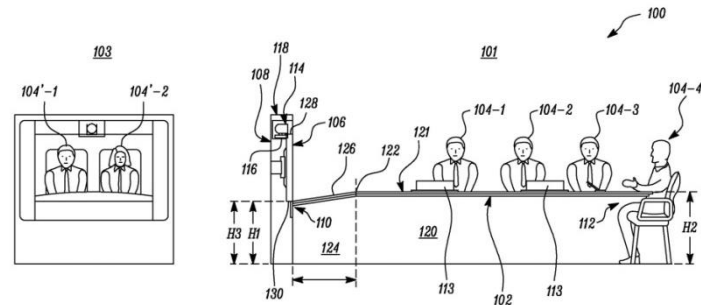

FIG. 1

U.S. Patent
Mar. 2, 2021
Sheet 1 of 5
US 10,939,073 B2

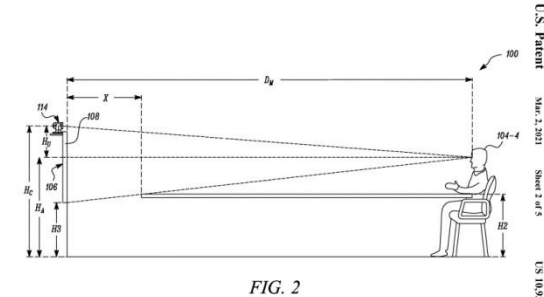

FIG. 2

U.S. Patent
Mar. 2, 2021
Sheet 2 of 5
US 10,939,073 B2

The tables & display assemblies are designed to improve eye contact with lowest ParalleX error !

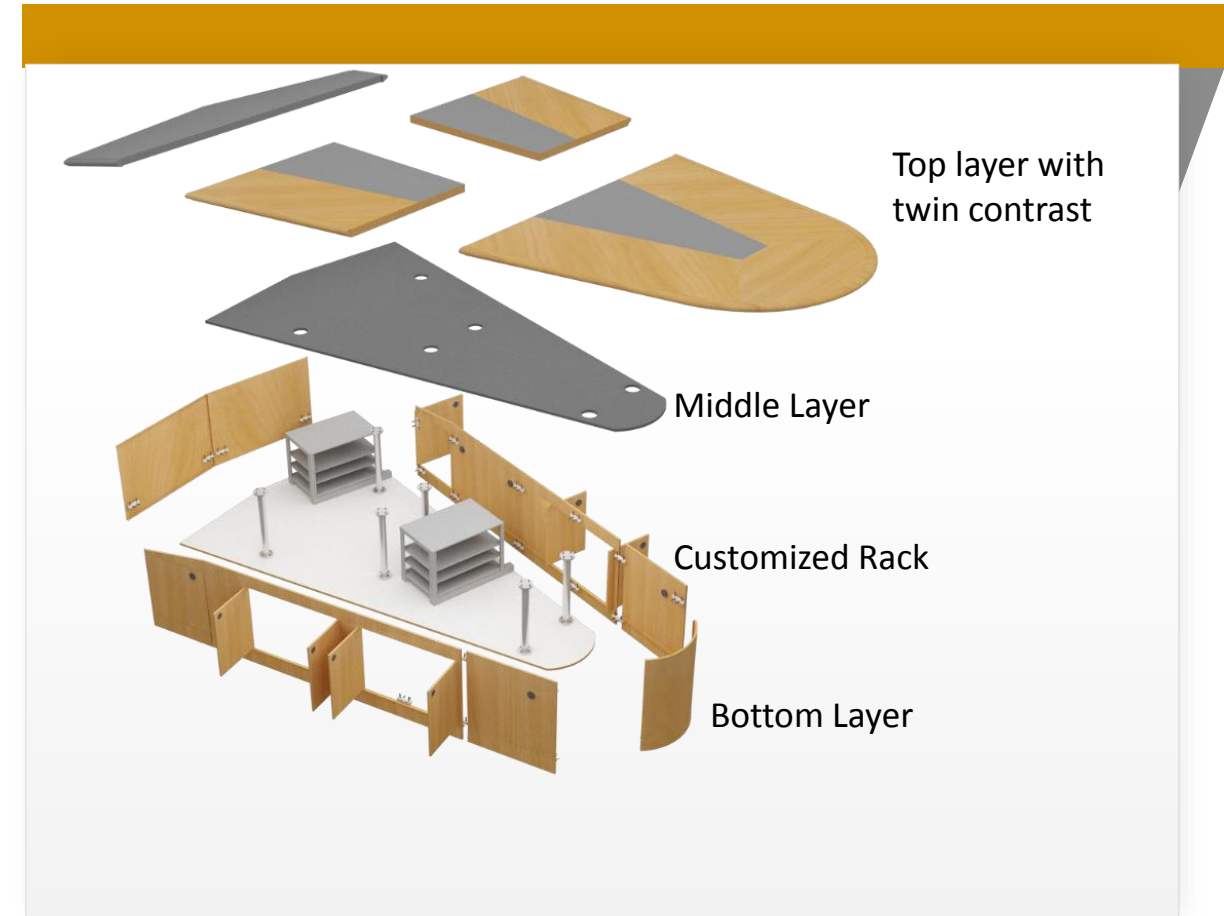

A) Video **Optimized Conference platforms** that are **much more effective than combination of ordinary conference tables and separate equipment racks.**

i. **Unique design of Smart conference platforms with three table tops as against one !**

These unique tables with Business Octane proprietary stainless steel legs have special capability of holding three table tops (as against normal of one table top only). One at the skirting level and two no's at the top level. Coupled with modesty panels till floor, these table tops provide for the state of the art rugged construction, housing of all wires, raceways, AV equipment and equipment racks.

This eliminates the need for raceways & conduits in the floor for the first time for all your conference rooms.

Further the conference platform well hides all the connecting cables of various equipment required to be embedded on the table such as cable cubbies, content monitors, microphones etc.

Give them the new Age Design & Aesthetics for highly functional, clutter less and flexible installations !

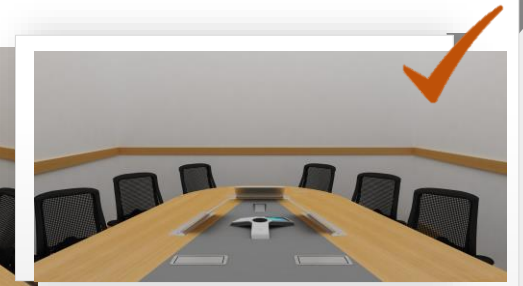

- ii. **Defined space for all table top equipment-** Technology embedded Conference platform with twin contrast color scheme table top with defined space for every equipment on the table top ensures your conference rooms still look absolutely beautiful without compromising on the functionality.
- iii. **Improved View of participants in Video Conferences -** Table top shape has been designed specially to help you see the least of table and most of participants' view in all video meetings as against the reverse that generally happens
- ii. **Wow factor due to tapering design of the table tops -** Apart from improving eye contact, tapering design at the end of the table tops adds to the "WOW" factor and gives a feeling of a cockpit.
- v. Built in equipment racks in the Conference platforms along with 12 db silent cooling fans gives an aesthetic look while saving your valuable real estate.

Defined space for all the equipment due to embedded technology

Conventional View

Improved View of participants

Tapering design for "WOW" factor

Give them the New Age Design & Aesthetics for highly functional, clutter less and flexible installations !

B) Smart Display Managers - The unique design hides all the displays, cameras, speakers & cables to give you an absolute clean front as well as a clean back for highly aesthetic appeal along with highest eye contact !

- i. For the first time, you can mount your display managers along with tables against the glass wall which will add further aesthetics to your work place. No alterations required in the existing interiors while installing your display managers as it is a freestanding monolithic assembly which does not need to be supported by the wall.
- ii. Further high quality tapering / rounded finish from rear for display managers make it look beautiful when viewed from the other side of the glass partition. The solutions are designed to act as one single new age aesthetics assembly unit to improve the eye contact as well as aesthetics,

Display managers along with tables against the glass will add further aesthetics to your work place

Display managers' clean front as well as clean rounded finished back

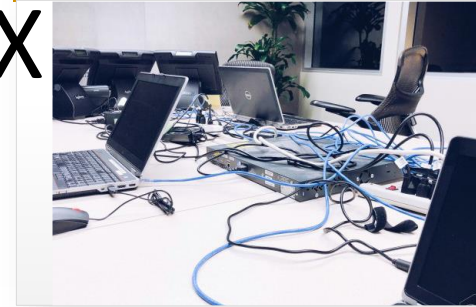

Give them the New Age Design & Aesthetics for highly functional, clutter less and flexible installations !

C) Custom designed **Cables Organiser (CableCILLIN)**

- i. **Custom designed Cables Organiser (CableCILLIN) keeps your table tops clutter free** on account of all the cables required for making presentations being stored in these boxes, ensuring that there would be no last minute search of presentation cables, power sockets, adaptors especially for international visitors. When cables are not in use they are pushed back into storage,
- ii. **(CableCILLIN) are designed to match with other equipment on the table tops such as content monitors & motorised mics.**
- iii. **(CableCILLIN) are designed** to provide maximum connectivity in the smallest possible footprint. In its smallest footprint, it has 2 universal power sockets and 2 USB for charging handheld devices and 6 grommets for keeping HDMI/ VGA/ MDP/ USB C Type, LAN and even laptop charger Cable.

X

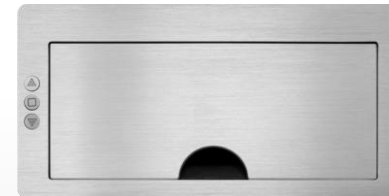

No more tripping cables in your conference room !

All cables needed to make presentations remain stored in the box

Matching Cable cillins with other equipment

Maximum connectivity with the smallest footprint

Special Capabilities of our Building Blocks

Our 90- 100% fundamentally “Collaboration In-a-Box Solutions” will help you standardize OCIT experience across your worldwide leaders very easily !

OUR “Collaboration In-a-Box Solutions”

I. A, Collaboration “In-a-Box” - A game changer Solution

World’s first all-in-one “collaboration in a box” solutions can be easily transported and gives you the flexibility to assemble, disassemble the systems in a matter of few hours.

- ii. **No room-preparation required:** No external conduiting and wiring in the floor/walls/ceiling is required.
- iii. **No long installation period** - Assemble over a weekend . You can easily move in the same office or to a different location.
- iv. **Get uniform high quality eye contact, content readability** & various other capabilities all across your various worldwide locations.
- v. **No binding of conference room requirement:** Use it in a room or in an open plan office.
- vi. **Built in Equipment rack & working raceways in the table** - **there is** no separate requirement of additional spaces which will save your valuable real estate and also will reduce the requirement of cables tremendously.

CollaboratorTURBOBMAX - Planned Views for Video & Local Meetings

Board Room & Conference Room Solution

Ideally suitable for large CEO/ Chairman's Cabins, Huddle rooms . Boardrooms & Mid Size Conference Rooms!
Available in the seating capacity of 4,6,8,10 &14 for video meetings which can be used as
8, 12, 14 & 20 PAX seating for local meetings separately !

CollaboratorTURBOMAX from Business Octane is all set to redefine how meeting spaces across your enterprise should be created for cloud video conferencing . Make your video meetings 400% more immersive by seeing the meeting participants 4 times bigger than traditional cloud video conferencing coupled with sharing & comparing of two presentations in local meetings.

Now get highest Ultra Immersive experience in your business video reviews as this allows you open chested Video Collaboration without any cold shouldering i.e looking over your shoulders when one talks to far site participants. Further, this seating arrangement sends same size view of all participants in one room, the experience of which is same as meeting face to face on two nearest sides of a oval table, This gives much better visibility to far site participants as against bowling alley tables which gives the experience of meeting on two farthest sides of a very long table !
