

New amazing whiteboarding in MS Teams video meetings!

Dear,

Greeting from Business Octane!

First things first- **Thank you, Microsoft!**

For enabling a very much-awaited feature of whiteboarding in MS Teams video calls happening from any of Microsoft's Teams room based video conference rooms.

Now, collaboration can be multiplied for the first time in all MS Teams video meetings with the help of Business Octane's embedded on table Touch Content Monitors, on account of new multiple location simultaneous interactive whiteboarding capabilities brought in by Microsoft in their Teams video platform.

Microsoft Teams

is amazing on table unobtrusive
touch content monitors
(motorized/non-motorized)

Collaboration multiplied.

Reasons to be thrilled for MS Teams video collaboration customers:

- Unlimited whiteboard that can be moved up or down, left or right.
- Simultaneous multiple location interactive whiteboarding means multiple locations can write on the same whiteboard at the same time.
- Put sticky notes or import documents to be pasted on the whiteboard.
- No stylus or writing pen required. Whiteboarding can be done by using finger instantaneously.
- Multiple colors can be selected.
- Whiteboarding notes can be saved, emailed or printed as per the requirements.

Get interactive whiteboarding along with full content legibility in all in MS Teams right from where you are sitting.

Highly unobtrusive 15.6" embedded on the table motorised or non motorised Touch Content monitors that are only 100 mm from tabletop and at angle of 150 degrees.

Monitor can be retrofitted in any table by just making a slit on the table top.

Highly unobtrusive 15.6" embedded on the table motorised and non-motorised Touch Content monitors that are only 100 mm from tabletop at 150 degrees of incline enable multiple locations interactive whiteboarding using your fingers without acting as an obstruction for hiding hands of the participants.

Further they also ensure content legibility for all meeting participants and also act as an additional/dedicated display for showing content when all the front displays are being used for showing multiple video streams in meetings such as chosen speaker view along with the gallery view and in near immersive and ultra-Immersive video telepresence meetings.

Trusted by hundreds of enterprise customers:
