

Dear Sir,
Greeting from Business Octane!

**Now even in your boardroom & large conference rooms,
your camera will follow you like your pet dog!**

If you are struggling to focus on your speakers in your video board meetings because of the large size of your rooms- then no

worries - During covid you have implemented MS teams and/ or zoom and/ or Google meet for video meetings. But whatever Crestron/Poly/ Logitech/Lenovo cloud VC solutions you have implemented in your board room, your senior management keeps on struggling in the video meetings on account of:

The camera does not focus automatically, instantly, and reliably on them when they move & speak, Consequently, they are shown very small to the remote participants. Further their video being sent is not very sharp.

Now kill two birds with one stone:

*Business Octane launches **Altra (Clarity +TRACK)** that will solve the problem of focusing on your speakers in your boardrooms. Just like a pet dog. **AltraTRACK** will follow your speakers no matter whatever may be the size of the room.

Further this system would also help you send & receive great audio in your video meetings while removing the reflected sound from glass partitions for the first time. Altra(Track+ Audio) will also get seamlessly integrated with your existing VC Systems.

Seeing is believing!

Thanks & Regards,

Sanjay Bansal
Chairman & Managing Director
